SUMMARY

With over 2 years of practice and experience in cyber security. I have honed my skills in web Application Penetration Testing, Active Directory Exploitation VAPT, Threat Detection, and many more. My expertise in finding bugs on system, ensure robust security protocols and my proactive approach to threat mitigation have been instrumental in safeguarding critical infrastructures. My most significant achievement includes playing a pivotal role in defending a major cyber-attack on a financial institution. I am eager to leverage my skills and experience to contribute to a forward-thinking cyber security team.
